

# artisanfoodsolutions

SAFE • FRESH • LOCAL

---

Artisan Food Solutions has been serving the food industry since 2011. Maintaining our mission to protect the health of our community members, we help farmers and food manufacturers supply a safe and wholesome food supply. We understand the challenges the small farmers have with food safety compliance providing an educational harmonized gap audit experience providing clear interpretation of the Standard requirements. We specialize in high risk crops such as leafy greens, sprouts, cantaloupe and tomatoes.

---

Artisan Food Solutions has participated in many facets of the Harmonized GAP Audit to include the development of the USDA Group GAP Standard and sitting on the United Fresh Harmonized GAP Calibration Committee.

---

Artisan Food Solutions, LLC realizes the food system is a complex web of activities involving the production, processing, transport, and consumption of food. Our services extend past food safety to address issues concerning the food system through small-farm advocacy, the degree at which we waste food, how food production affects the natural environment and the impact of food and nutrition for disease prevention.
